

Performance Fabrics

for Ultimate Comfort

FEEL THE DIFFERENCE

PrimaLoft® PERFORMANCE FABRICS are engineered for performance and comfort, so that you can enjoy the outdoors to the fullest—staying out longer, in any weather condition.

PrimaLoft® PERFORMANCE FABRICS are made up of ultra-fine polyester fibers which are finer than cashmere, resulting in a luxuriously soft performance fabric. PrimaLoft® PERFORMANCE FABRICS can be made from PrimaLoft® fibers alone or combined with other materials to enhance softness and performance.

100% PRIMALOFT® BLEND

An ideal choice for base layers and other next to skin applications, 100% PrimaLoft® fabrics offers superior softness and keeps you drier than conventional polyester yarns.

PRIMALOFT® MERINO BLEND

An optimal blend of PrimaLoft® fibers and soft Merino wool makes this blend an ideal choice for outdoor enthusiasts who demand absolute performance and comfort. The hydrophobic properties of PrimaLoft® fibers and hydrophilic properties of Merino wool combine to form a dynamic moisture management system that transfers moisture away from the skin and pushes it out through the surface, keeping you dry and comfortable. The combination of technology and nature results in a fabric blend that is durable and dries quickly, with minimal shrinkage.

FIBER THICKNESS

PrimaLoft® fibers are finer than cashmere and half the size of merino wool!

Fiber diameter directly influences softness. If you compare canvas fabric to silk fabric, the finer fibers result in a softer material. PrimaLoft® fibers have been engineered to be ultra fine for maximum softness.

Excellent Warmth

Superior Softness

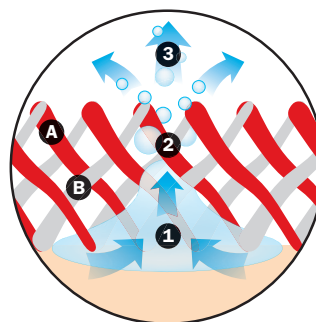

Quick Dry Time

Enhanced Durability

Better Pill Resistance

“I’m super stoked about socks made with PrimaLoft®. I am a big fan of PrimaLoft®, and so far I have used the socks in all different temperatures.”

—Janette Hargin
Swedish Alpine Ski Champion

MOISTURE TRANSFER

- A** PrimaLoft® fiber
- B** Wool fiber
- 3** Moisture vapor exits the surface.
- 2** Transferring of moisture vapor.
- 1** PrimaLoft® YARN transfers moisture vapor away from the source.

PrimaLoft® insulation was originally developed for the US Army as a water-resistant synthetic alternative to down. Today, PrimaLoft® is regarded as a research and development leader in high performance insulations and fabrics, which provide warmth and comfort from head to toe. Its family of products are manufactured in the US, Europe and Asia. The PrimaLoft® brand is recognized globally and is used in leading outdoor and fashion brands, home furnishings, work wear and military applications.
